

# Cerner session descriptions

## **Evaluation Instructions:**

Please click associated links (column E) for each session to complete evaluation form(s)

**IMPORTANT:** Evaluations may contain more than one department / area for scoring

Once the form is open scroll down to find the section(s) pertaining to your department / assigned area(s)

<b>Acute Case Management</b>	45 Min	Cerner's Acute Case Management session demonstrates the ability to translate clinical and financial data into meaningful information. Because all clinical and financial information is stored within the same database, Case Managers can take advantage of existing care documentation. Task based worklists present key components to streamline workflow such as utilization review, denial avoidance and management and discharge planning.	Selection Committee Senior Executives Information System Analysts Care Management Leadership Utilization Review Nurses Discharge Planners Social Workers	<a href="#">Acute CM</a>
<b>Acute Provider</b>	45 Min	Cerner's Inpatient Day in the Life session demonstrates how Cerner puts the patient at the center of health and care with our one integrated medical record. Cerner's solution will provide efficient workflows from an admission to discharge, including physician mobility. We will explore clinical decision support embedded in the solution and how Cerner is working with our clients to continually deliver a first-class physician experience.	C-Suite Physician Leadership IT Leadership Hospitalists	<a href="#">Acute Provider</a>
<b>Ambulatory Provider</b>	75 Min	Cerner's Ambulatory Physician Day in the Life session demonstrates how our workflows will streamline the physician's time spent in the EHR. We will display how our embedded tools support closing gaps in care for individual patients and across the patient population. We will also showcase our provider mobility solution that will support physicians on the go and how they can manage their patients from their mobile device.	C-Suite Clinic Managers Physicians Physician Leadership IT Leadership	<a href="#">Amb Eval Form</a>
<b>Ambulatory Practice Management (Front Office Workflow)</b>	60 Min	Cerner's Ambulatory Practice Management sessions demonstrates the day to day activities from the front office perspective. From an integrated schedule and registration management, referral management and patient arrival, all workflows are executed in an all-encompassing solution. Front office activities drive the clinical perspective to efficiently access daily appointments and tasks that automatically produce financial activity.	Selection Committee Senior Executives Ambulatory Practice Management Leaders Information System Analysts Ambulatory Office Administrators	<a href="#">Amb Eval Form</a>
<b>Behavioral Health</b>	90 Min	Cerner's Behavioral Health specific tools and content are designed and embedded within the EMR for our mental health providers. Cerner's vast library of validated scales and assessments assist clinicians in assessment, evaluation and documentation of behavioral and mental health services.	Selection Committee Senior Executives Information System Analysts Psychologists Psychiatric Clinicians Psychiatric Nurses Social Workers Care managers	<a href="#">Behavioral Health</a>
<b>Billing / Acute and Ambulatory Billing and Patient Accounts</b>	60 Min	Cerner's Billing session showcases how Cerner's clinically driven platform automates charge activity and claim generation as a byproduct of clinical documentation. The demonstration will follow the billing process from charge generation down to self-pay through the use of exception-based workflows that are created to appropriately route and prioritize work while limiting manual intervention. Reporting and analytics related to billing give visibility to the financial health of the organization providing the capabilities to Define KPI Metrics and drill down to root cause details. <b>Cerner Overview</b>	30 Min	Learn about Cerner and how the CommunityWorks delivery model has been tailored to over 220 critical access and community hospitals across the U.S. to meet the needs of rural healthcare.	C-Suite Department Directors All staff participating in Cerner presentations welcome	<a href="#">General</a>

<b>Clinic Nursing</b>	30 Min	Cerner's Clinic Nursing session demonstrates various tools available for chart prep, documentation, and in-between visit activities. We will cover patient intake, communication, task management, and follow-up, as well as, the efficiencies Cerner has put into place to help the clinic staff effectively and efficiently see and manage patients both during clinic appointments and working with patients who are not on the schedule.	Clinic Nursing Staff Clinic Administrators Physicians	<a href="#">Amb Eval Form</a>
<b>Clinical Quality Outcomes</b>	60 Min	Cerner's Clinical Quality Outcomes sessions demonstrates proactive monitoring and capturing of quality data as a byproduct of your patient care documentation.	Selection Committee Senior Executives Information System Analysts Director of Quality Nursing Leadership	<a href="#">Quality</a>
<b>Consumer Engagement</b>	60 Min	The Consumer Engagement session showcases how Cerner's Consumer Framework, our digital engagement platform, enables you to connect with your consumers, patients, members, and employees through a unified experience. You will see how you can engage with Cerner-developed functions, strategic third-party applications, and external content through a seamless user experience and streamline your administrative operations and lower costs by reducing manual processes.		<a href="#">General</a>
<b>Emergency Department Workflow</b>	60 Min	Cerner's Emergency Department workflow session demonstrates how nurses, physicians, and midlevel providers can navigate the chart and complete documentation for the various patient scenarios seen within the emergency department quickly and easily. You will see a range of automated processes, smart technology, and intuitive workflows that will streamline patient throughput and improve clinical and financial efficiencies.	Selection Committee Senior Executives Information System Analysts ED Clinicians Nursing Leadership	<a href="#">ED and Acute Provider</a>
<b>Health Information Management</b>	45 Min	Cerner's Health Information Management session demonstrates chart completion management, release of information, coding, document imaging, workflow and reporting. We will see how integrated workflows help reduce redundant data entry and manual activities.	Selection Committee Senior Executives HIM Leadership HIM System Analysts	<a href="#">HIM</a>
<b>Hospital Scheduling and Registration</b>	60 Min	Cerner's Hospital Scheduling and Registration session demonstrates simultaneous management of patient demographics while scheduling various appointments in a centralized or decentralized setting. We will follow a patient from the point of scheduling, financial clearance and the point of registration. Cerner patient access adds ease to completing tasks such as medical necessity, eligibility management and point of service collections all while leveraging rule logic to drive accuracy in capturing patient information.	Selection Committee Senior Executives Information System Analysts Scheduling Leadership Registration Leadership Business Office Leadership	<a href="#">Pt Access</a>
<b>Implementation Methodology and Governance Through a Cloud Delivery</b>	1 Hour 45 Min	Taking a best practice approach to an EHR implementation. Hear about the people, process, and technology that it takes to have a successful EHR go-live, no matter the company you choose. Learn about setting up a governance structure to take on the latest code upgrades to keep your health system on the cutting edge of technology without creating silos across your organization.	C-Suite Physicians Nursing Leadership IT Director IT Analysts Department Directors All staff welcome	<a href="#">General</a>
<b>Infection Control</b>	60 Min	Cerner's Infection Control solution addresses the needs of healthcare facilities by promoting organization-wide surveillance of infections to enhance patient safety and outcomes. This session will focus on tools that provide infection preventionists with analytical information to identify, monitor, and manage care-associated and drug-resistant infections.	Selection Committee Senior Executives Infection Preventionist	<a href="#">General</a>
<b>Inpatient Nursing Workflow (Respiratory Therapy &amp; Inpatient Wound)</b>	60 Min	Cerner's Inpatient Nursing Workflow session demonstrates a journey through patient-centered care delivery for the inpatient nurse. We will be able to see a single integrated medical record that will span across the continuum of care and provide pertinent information in an organized view. Cerner's inpatient nursing experience focuses on quality, safety, efficiency, and financial performance.	Selection Committee Senior Executives Information System Analysts Nursing Leadership Nursing Staff	<a href="#">IP Nursing</a>
<b>Interoperability</b>	30 Min	Cerner believes that the patient's information should flow freely between care providers; regardless of vendor, organizational, or geographic barriers. Cerner is leading the industry in interoperability and this demonstration will show how Cerner embeds interoperability into our workflows. See how information is displayed and managed in both individual patient records and in overarching population health management tools all from a single solution providing streamlined end-user experience. This demonstration will provide insights into how a connected health ecosystem will benefit both the patient and the care team through interoperability.	Physicians Nurses Executive Leadership Nursing Leadership Clinical Informaticists	<a href="#">General</a>
<b>Laboratory</b>	60 Min	Cerner's Laboratory session demonstrates an overview of Cerner's fully integrated laboratory management solution showcasing workflow tools to improve efficiency and streamline departmental operations from order entry to results distribution.	Selection Committee Laboratory Leadership IT Analysts Laboratory Staff	<a href="#">Lab</a>

<b>Materials Management</b>	60 Min	Cerner's Materials Management session demonstrates how our clinically driven inventory management solutions can optimize your supply chain to drive both internal and external procurement processes.	Selection Committee Senior Executives Information System Analysts Materials Management Leadership Materials Management Buyer OR Leadership	<a href="#">ERP</a>
<b>Perioperative Nursing Workflow</b>	60 Min	Cerner's Perioperative session demonstrates the activities that occur throughout the course of elective and non-elective surgical care, from surgical scheduling through to discharge from surgical recovery (PACU). This session demonstrates intuitive documentation and perioperative tracking framework preoperatively, intraoperatively, and postoperatively alongside dashboard and reporting tools to provide insight into departmental quality and improvement initiatives.	Selection Committee Senior Executives Information System Analysts OR Leadership OR Clinicians PAT Leadership PACU Leadership PACU Clinicians	<a href="#">Surgery</a>
<b>Pharmacy Workflow</b>	75 Min	Cerner's Pharmacy session demonstrates embedded clinical decision support within a closed loop medication process from physician order entry to pharmacist verification and eMAR barcode medication administration. We will see how the solution provides the pharmacist with clinical tools for patient monitoring, intervention tracking, and clinical documentation.	Selection Committee Senior Executives Information System Analysts Pharmacy Leadership Pharmacists	<a href="#">Pharmacy</a>
<b>Population Health</b>	60 Min	Cerner's Population Health session demonstrates how to enable your organization and providers to proactively know, engage, and manage your desired population by driving quality of care in the workflow.	C-Suite Key Physicians IT Associates	<a href="#">General</a>
<b>Radiology Workflow</b>	60 Min	Cerner's Radiology session demonstrates workflow tools to improve efficiency and streamline departmental operations from order entry to image interpretation and results distribution.	Selection Committee IT Analysts Radiology Leadership Imaging Staff RIS/PACS Administrators	<a href="#">Radiology</a>
<b>Reporting Tools &amp; Methodology</b>	60 Min	Cerner's Reporting Tools & Methodology sessions demonstrates a review of standard reports, ad hoc reporting, training, and the support model for clinical and financial reporting. Executive Dashboards & Cerner CommunityWorks proactive reporting team.	C-Suite Revenue Cycle Director HIM Analyst Director of Quality Analytics lead	<a href="#">Reports</a>
<b>Revenue Cycle Day in the Life</b>	60 Min	Cerner's Revenue Cycle Day in the Life session showcases how the integration across each venue drives financial activity through our clinically driven platform. The demonstration will follow a patient visit through multiple venues from patient access down to billing and reporting in order to highlight how the integration between each department creates operational efficiencies, as well as automates downstream charge generation through clinical documentation.	All Revenue Cycle Staff	<a href="#">Revenue Cycle</a>
<b>Shaping Healthcare Together (Day in the Life)</b>	60 Min	Watch as Cerner shapes the healthcare experience for patients, clinicians, and healthcare systems. This presentation will follow one family's journey where you'll see clinical scenarios spanning different venues of care and various clinical workflows. You'll experience Cerner's intuitive, clinically driven, and consumer-focused solutions, seeing how data presented to the right person at the right time is turned into actionable insights shaping health and care delivery.	Selection Committee Senior Executives Information System Analysts Physicians Hospitalists Nursing Leadership Nursing Staff	<a href="#">General</a>
<b>Women's Health</b>	75 Min	Cerner's Women's Health session demonstrates an overview of the solutions that automate the entire maternity process – from prenatal care through the post-partum period. The integration of all the data collected during this journey result in a robust EMR record for both mother and baby.
